

# Welcome to the CMCS Maternal and Infant Health Initiative Developmental Measures Reporting Template

Federal Fiscal Year

2015

[Request Technical Assistance](#)

[View Implementation Guide](#)

Is your state participating in the "Adult Medicaid Quality: Improving Maternal and Infant Health Outcomes in Medicaid and CHIP" grant? \*

☒ Yes

☐ No

Please select the quality measure(s) you will be entering:

Please note that the reporting of the "Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Women" is optional, except for states awarded the grant. States participating in the "Adult Medicaid Quality: Improving Maternal and Infant Health Outcomes in Medicaid and CHIP" grants must complete this measure. Grantees are encouraged to report on a secondary measure, "Use of Contraceptive Methods by Postpartum Women". If not reporting on the secondary measure, the grantee state must still access the screen for this measure and select "No" to the question "Are you reporting on this measure?" and complete the "Not Reporting on Measure" section.

For non-grantee states, both measures are optional. Submission of the Maternal and Infant Health report is not required. If reporting on one measure only (e.g. Use of Contraceptive Methods by Postpartum Women), the state must also access the screen for the other measure which is not being reported (e.g. Use of Contraceptive Methods by Women) and select "No" to the question "Are you reporting on this measure?" and complete the "Not Reporting on Measure" section.

Would you like to validate the core measure data at this time?

☒ Yes ☐ No

(Note: While the measure does not need to be validated at this time in order to proceed, each measure must be validated for the measure to be marked as 'complete' and before the report can be submitted to CMS).

Note: If validation fails, errors will appear in red above.

**Date Range**

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

+/-

**Definition of Denominator***Select all that apply (Must select at least one)*

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☐ Yes
- ☒ No

**Explain which populations are excluded and why \***

Specify Total Measure Eligible Population \*

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Date Range

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a “look-back period” before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the “look-back period.”

Definition of Population Included in the Measure

+/-

Definition of Denominator

Select all that apply (Must select at least one)

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☒ Yes
- ☐ No

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives

items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Performance Measure

+/-

The propotion of women aged 15-44 years who are at risk of unintended pregnancy and who adopt or continue use of:

- 1) The most effective or moderately effective FDA-approved methods of contraception.
- 2) An FDA-approved, long-acting reversible method contraception

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor

Additional Notes

+/-

Rate 1: Most effective or moderately effective contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Rate 2: Long-acting reversible contraception

Additional Notes/Comments on Measure (Optional)

Date Range

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a “look-back period” before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the “look-back period.”

Definition of Population Included in the Measure

+/-

Definition of Denominator

Select all that apply (Must select at least one)

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☒ Yes
- ☐ No

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives

items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Performance Measure

+/-

The propotion of women aged 15-44 years who are at risk of unintended pregnancy and who adopt or continue use of:

- 1) The most effective or moderately effective FDA-approved methods of contraception.
- 2) An FDA-approved, long-acting reversible method contraception

☒ Ages 15-20

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor

Additional Notes

+/-

Rate 1: Most effective or moderately effective contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Rate 2: Long-acting reversible contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Optional Measure Stratification

+/-

If this measure is also reported by additional classifications/sub-categories, e.g. racial, ethnic, gender, language, disability status, or geography, complete the following as applicable.

Date Range

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a “look-back period” before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the “look-back period.”

Definition of Population Included in the Measure

+/-

Definition of Denominator

Select all that apply (Must select at least one)

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

**Specify \***

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☒ Yes
- ☐ No

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

- ☒ Fee-for-Service

**Percentage of total state FFS population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state’s fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Performance Measure

+/-

The propotion of women aged 15-44 years who are at risk of unintended pregnancy and who adopt or continue use of:

- 1) The most effective or moderately effective FDA-approved methods of contraception.
- 2) An FDA-approved, long-acting reversible method contraception

☒ Ages 15-20

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Rate 2: Long-acting reversible contraception

If yes, indicate whether the state-level rate is weighted

Must select one \*

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Additional Notes

+/-

**Date Range**

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

+/-

**Definition of Denominator***Select all that apply (Must select at least one)*☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other

Specify \*

**Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \***☒ Yes☐ No

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Additional Notes

Would you like to validate the core measure data at this time?

☐ Yes ☒ No

(Note: While the measure does not need to be validated at this time in order to proceed, each measure must be validated for the measure to be marked as ‘complete’ and before the report can be submitted to CMS).

Warning: Any field containing more than 4000 characters will be truncated when saved.

# Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Postpartum Women

Medicaid Adult Core Quality Measure - OR - 2015

Federal Fiscal Year

**Date Range**

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

+/-

**Definition of Denominator***Select all that apply (Must select at least one)*☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

☐ Yes☒ No

Explain which populations are excluded and why \*

Specify Total Measure Eligible Population \*

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Other Performance Measure

No items available				

+ Additional/Other Rate(s)

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☒ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Additional Notes

+/-

Rate 1: Most effective or moderately effective contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Rate 2: Long-acting reversible contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Optional Measure Stratification

+/-

If this measure is also reported by additional classifications/sub-categories, e.g. racial, ethnic, gender, language, disability status, or geography, complete the following as applicable.

**Date Range**

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

+/-

**Definition of Denominator***Select all that apply (Must select at least one)*☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

☐ Yes☒ No

Explain which populations are excluded and why \*

Specify Total Measure Eligible Population \*

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Other Performance Measure

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☐ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☒ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☐ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☒ The rates are weighted based on another weighting factor
- ☐ The rates are not weighted

**Date Range**

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

+/-

**Definition of Denominator***Select all that apply (Must select at least one)*☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

☐ Yes☒ No

Explain which populations are excluded and why \*

Specify Total Measure Eligible Population \*

Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

	0	0	0	Clear Row
	0	0	0	Clear Row

+ Additional/Other Rate(s)

Combined Rate(s) from Multiple Reporting Units

+/-

Rate 1: Most effective or moderately effective contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☐ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☒ The rates are not weighted

Rate 2: Long-acting reversible contraception

Did you Combine Rates from Multiple Reporting Units (e.g., health plans, delivery systems, programs) to Create a State-Level Rate? \*

- ☒ Yes
- ☐ No

If yes, indicate whether the state-level rate is weighted

Must select one \*

- ☐ The rates are weighted based on the size of the measure-eligible population for each reporting unit
- ☐ The rates are weighted based on another weighting factor
- ☒ The rates are not weighted

Additional Notes

+/-

Rate 1: Most effective or moderately effective contraception

Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Rate 2: Long-acting reversible contraception  
Additional Notes/Comments on Measure (Optional)

Character count: 0/2000

Optional Measure Stratification

+/-

If this measure is also reported by additional classifications/sub-categories, e.g. racial, ethnic, gender, language, disability status, or geography, complete the following as applicable.

- ☒ Yes  
☐ No

## Status of Data Reported

+/-

What is the status of the data being reported? \*

- ☒ Provisional  
☐ Final  
☐ Same data as reported in a previous year's annual report

## Measurement Specification

+/-

For non-grantee states, both measures are optional. Submission of the Maternal and Infant Health report is not required. If reporting on one measure only (e.g. "Use of contraceptive Methods by Postpartum Women"), the state must also access the screen for the other measure which is not being reported (e.g. "Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Postpartum Women") and select "No" to the question "Are you reporting on this measure?" and complete the "Not reporting on Measure" section.

**Specify \***

**Date Range**

[+/-](#)

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

[+/-](#)

**Definition of Denominator**

Select all that apply (Must select at least one)

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

**Specify \***

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☒ Yes
- ☐ No

**Which delivery systems are represented in the Denominator?**

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

**Percentage of total state FFS population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

**Percentage of total state PCCM population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

**Number of Health Plans \***

**Percentage of total state MCO/PIHP population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

**Percentage of total state ICM population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

**Describe \***

**Percentage of total other population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

**If applicable, list the number of Health Plans represented \***

# Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Women

Medicaid Adult Core Quality Measure - OR - 2015

## Federal Fiscal Year

2015

Request Technical Assistance

Clear

View All Responses

Are you reporting on this measure? \*

[View Implementation Guide](#)

- ☒ Yes  
☐ No

## Status of Data Reported

+/-

What is the status of the data being reported? \*

- ☐ Provisional  
☒ Final  
☐ Same data as reported in a previous year's annual report

## Measurement Specification

+/-

For non-grantee states, both measures are optional. Submission of the Maternal and Infant Health report is not required. If reporting on one measure only (e.g. "Use of contraceptive Methods by Postpartum Women"), the state must also access the screen for the other measure which is not being reported (e.g. "Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Postpartum Women") and select "No" to the question "Are you reporting on this measure?" and complete the "Not reporting on Measure" section.

**Date Range**

[+/-](#)

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

**Definition of Population Included in the Measure**

[+/-](#)

**Definition of Denominator**

Select all that apply (Must select at least one)

- ☒ Denominator includes Medicaid population
- ☒ Denominator includes CHIP population (e.g. pregnant women.)
- ☒ Denominator includes Medicare and Medicaid Dually-Eligible population
- ☒ Other

**Specify \***

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

- ☒ Yes
- ☐ No

**Which delivery systems are represented in the Denominator?**

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

**Percentage of total state FFS population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

**Percentage of total state PCCM population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

**Number of Health Plans \***

**Percentage of total state MCO/PIHP population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

**Percentage of total state ICM population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

**Describe \***

**Percentage of total other population represented \***

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

**If applicable, list the number of Health Plans represented \***

Would you like to validate the core measure data at this time?

☒ Yes ☐ No

(Note: While the measure does not need to be validated at this time in order to proceed, each measure must be validated for the measure to be marked as 'complete' and before the report can be submitted to CMS).

Note: If validation fails, errors will appear in red above.

Are you reporting on this measure? \*

[View Implementation Guide](#)

- ☒ Yes  
☐ No

## Status of Data Reported

+/-

What is the status of the data being reported? \*

- ☐ Provisional  
☐ Final  
☒ Same data as reported in a previous year's annual report

Specify the year of annual report in which data previously reported \*

2014

## Measurement Specification

+/-

For non-grantee states, both measures are optional. Submission of the Maternal and Infant Health report is not required. If reporting on one measure only (e.g. "Use of contraceptive Methods by Postpartum Women"), the state must also access the screen for the other measure which is not being reported (e.g. "Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Postpartum Women") and select "No" to the question "Are you reporting on this measure?" and complete the "Not reporting on Measure" section.

## Date Range

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

## Definition of Population Included in the Measure

+/-

### Definition of Denominator

Select all that apply (Must select at least one)

☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other

Specify \*

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

☒ Yes☐ No

### Which delivery systems are represented in the Denominator?

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*

Would you like to validate the core measure data at this time?

☒ Yes ☐ No

(Note: While the measure does not need to be validated at this time in order to proceed, each measure must be validated for the measure to be marked as 'complete' and before the report can be submitted to CMS).

Note: If validation fails, errors will appear in red above.

# Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Women

Medicaid Adult Core Quality Measure - OR - 2015

Federal Fiscal Year

2015 ▼

Request Technical Assistance

Clear

View All Responses

Are you reporting on this measure? \*

[View Implementation Guide](#)

- ☒ Yes  
☐ No

## Status of Data Reported

+/-

What is the status of the data being reported? \*

- ☐ Provisional  
☐ Final  
☒ Same data as reported in a previous year's annual report

Specify the year of annual report in which data previously reported \*

2014 ▼

## Measurement Specification

+/-

For non-grantee states, both measures are optional. Submission of the Maternal and Infant Health report is not required. If reporting on one measure only (e.g. "Use of contraceptive Methods by Postpartum Women"), the state must also access the screen for the other measure which is not being reported (e.g. "Maternal and Infant Health Initiative Developmental Measure: Use of Contraceptive Methods by Postpartum Women") and select "No" to the question "Are you reporting on this measure?" and complete the "Not reporting on Measure" section.

## Date Range

+/-

For all measures, states should report start and end dates for the measurement period. For some measures, the specifications require a "look-back period" before or after the measurement period to determine eligibility or utilization. The measurement period entered in the Start and End Date fields should not include the "look-back period."

## Definition of Population Included in the Measure

+/-

### Definition of Denominator

*Select all that apply (Must select at least one)*☒ Denominator includes Medicaid population☒ Denominator includes CHIP population (e.g. pregnant women.)☒ Denominator includes Medicare and Medicaid Dually-Eligible population☒ Other**Specify \***

Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure? \*

☐ Yes☒ No**Explain which populations are excluded and why \*****Specify Total Measure Eligible Population \*****Which delivery systems are represented in the Denominator?**

Select all delivery systems that apply in your state (must select at least one); for each delivery system selected, enter the percentage of the measure eligible population represented by that service delivery system. For example, if the measure-eligible population represents all managed care enrollees, enter 100 percent for MCO.

☒ Fee-for-Service

Percentage of total state FFS population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Primary Care Case Management (PCCM)

Percentage of total state PCCM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Managed Care Organization / Pre-paid Inpatient Health Plan (MCO / PIHP)

Number of Health Plans \*

Percentage of total state MCO/PIHP population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Integrated Care Models (ICM)

Percentage of total state ICM population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

☒ Other

Describe \*

Percentage of total other population represented \*

The percentage provided here should represent the percentage of the denominator population(s) included in the measure (i.e., Medicaid, CHIP, etc.) that receives items/services through the selected delivery system. For example, if the population included in the reported data represents all managed care enrollees and half of your state's fee-for-service enrollees, select managed care and enter 100, and select fee-for-service and enter 50.

If applicable, list the number of Health Plans represented \*
